

Shrisaikumar Sonari

Full Stack Developer (MERN)

Mumbai, Maharashtra | +91-9970578318 | shrisai225@gmail.com

LinkedIn | GitHub

Summary

Full Stack Developer and AI & Data Science graduate with hands-on experience building scalable web applications using JavaScript, React.js, Node.js, Express.js, MongoDB, and MySQL. Experienced in REST API integration, component-based frontend development, backend authentication systems, and database-driven applications. Skilled in debugging, performance optimization, version control workflows, and developing responsive user-centric interfaces. Strong problem-solving mindset with the ability to collaborate effectively in Agile and cross-functional environments.

Skills

Frontend: HTML, CSS, React.js, Next.js, JavaScript, Tailwind CSS

Backend: Node.js, Express.js, API Design, Authentication (JWT),

Databases: MongoDB, MySQL, SQL(Foundational)

QA & Testing: Manual Testing, Test Case Design

Cloud Platforms: AWS (EC2, S3).

AI & LLM: OpenAI API, Prompt Engineering, Real-time AI Systems

Realtime: WebSockets, Socket.io

Tools: Git, Github, Postman, Cloudinary, Docker (Basics)

Workflow & Tools: Agile Methodology, Git, Github, Debugging, Error Handling

Experience

Frontend Development Intern – GGST INNOVATIONS PVT LTD

January 2026 – April 2026 [Remote]

- Contributed to the development of a scalable e-commerce admin dashboard using Next.js, focusing on modular component design for long-term maintainability.
- Collaborated on the integration of 10+ RESTful APIs to transition the application from mock data to live endpoints, while establishing strict error-handling strategies.
- Implemented performance optimizations, including migrating assets to Next.js Image components and building Skeleton loading states to enhance future perceived load times.

Projects

SigmaGPT (AI Chat Application) [\[Live Link\]](#) –

- Engineered a real-time AI chat application using the MERN Stack (MongoDB, Express, React, Node.js), implementing Socket.io to establish bi-directional communication and reduce message latency by 40% compared to standard HTTP polling.
- Integrated the OpenAI GPT-4 API with a custom stream handling service, ensuring seamless text generation and maintaining application state across sessions using React Context API.
- Architected a secure backend system featuring JWT-based authentication and bcrypt encryption to protect user data, while designing a normalized MongoDB schema to efficiently store and retrieve nested chat histories.

Wanderlust (Vacation Rental Platform) [\[Live Link\]](#) –

- Developed a scalable vacation rental marketplace with full CRUD capabilities and Passport.js authentication.
- Implemented dynamic geospatial features using Mappls API for interactive map visualization.
- Engineered a cloud-based media pipeline using Cloudinary, optimizing image uploads for 30% faster loads.

Education

B.E. in Artificial Intelligence and Data Science

Vidyavardhini's College of Engineering and Technology, Vasai West

Dec 2021 – Jun 2025

Certifications

- Full Stack Development - Apna College
